If you are looking for a hard working, dedicated, junior developer who is open minded and always looking to grow than you have found him! I am familiar with HTML5, CSS3, Javascript, jQuery, Bootstrap, SASS, Git/Github, and creating responsive web sites, apps, & services. For my most current work visit my sites www.TonyCarbetta.com & www.CarbettaCoding.com

<u>Professional Overview</u>
With over 10 years in sales and web development service I am effectively
Able to build a client side Web presence from the ground up — from concept, design, navigation, layout and programming. I Work very well under pressure and in fast paced environments with strict deadlines. Extremely *punctual* & dependable. When things get rough I'm the one you can depend on to still show up and get the job done.

- Develop and launch visually appealing, user-friendly dynamic secure websites with interactive features to optimize traffic, page views, and user experience (UX).
- Provide complete Responsive Website launching services for any small business using best web practices programs and tools.
- Regularly keep up with site maintenance, as projects are being completed and updated.
- Create a positive customer service and sales experience with clients.
